

ABSTRACT OF THE DISCLOSURE

It is an object of this invention to provide a
multilayered structure molded product formable by
reusing a resin molded product. To achieve this object,
5 a multilayered structure resin molded product including
a core layer and a skin layer is molded using a
pulverized resin material, which is formed by
pulverizing a molded product molded from a thermoplastic
resin material, as a resin material for forming the core
10 layer, and a virgin material as a resin material for
forming the skin layer.
